

Software Requirement Specification for Facebook

Prepare By: Ayman Mohamed Osama

1. Adding Posts

You can use Facebook to share photos and videos with your friends, you can do this from Home page by push on what's on your mind

1.1. Add Post

→ You can Add a single post (Photo/Video/check-in/live video/camera/feeling/activity)

◆ You can either use photo/video and browse from your photos and videos

◆ You can either use check-in to put your current location in a place

◆ You can either use live video to make a video live

◆ You can either use camera to take photo or video and post them

◆ You can either use feeling or activities to share your feeling now or current activities

photos and videos

→ You can Write a something after select photo or video

→ You can Tag people by pus tag blue icon

→ You can Add a location or felling on this post

◆ You can see a list of a nearby places to select from them when push location red icon

or to search by your own location

→ You Share to other social networks like Instagram,

→ Save post as Draft

→ Turn off commenting

→ Share/Copy its link to anywhere

→ Like, and reply to comments on your post

→ Save your post

→ Edit, Delete, Archive post

2 : Adding Stories

With stories, you can share photos and videos that disappear from your profile, feed and messages after 24 hours, unless you add them to your profile as story highlights, you can do this from 2 different places with the same behavior: Home page, and Profile page

2.1. creating a Story

→ Post a single Story (Photo/Video)

◆ You can either use camera for a new photo/video or browse from your photos and videos

→ Post multi stories at once

◆ You can use mix of photos and videos either by using camera for a new photo/video or browse from your photos and videos

→ Tag people

◆ You can tag friends accounts, by using the “@Mention” sticker, or by adding “@” while adding a text

→ Save the story to your mobile

→ Share the story to friends

→ Share the story to close friends

◆ If you didn't set the close friends list before, it will ask you for defining the list first then share

→ Share the story to the direct messages

◆ You can search for the friend name to send him the story in the direct messages

◆ You could select only one or more friends to send them the story

◆ In case of multiple friends you have 2 options

- Send story to each one individually
 - Sent story to both of them in a group and you could name this group
- Share the story as a post (After it is already shared as a story)
- After it is posted from 2 places Home page, and profile page
- You can view a stream of stories posted by you and your friends from the home page, and you can reply on them

3 : Messaging

- you can push on messenger icon top right on Facebook app
